This certificate is issued by DHL Express. The greenhouse gas emissions have been calculated and reduced based on expenditures of the GoGreen Plus Services and contractually agreed emission reduction abatement price for sustainable aviation fuel. Through a book-and-claim accounting process, the greenhouse gas emission reductions are allocated to the customer's emission balance even if DHL Express is not physically using SAF at the locations where the customer's shipments are transported.

According to DHL Group's Sustainable Fuel Policy only sustainably produced fuels without palm oil and palm fatty acid distillate (PFAD) certified by the Roundtable of Sustainable Biomaterials (RSB) or International Sustainability & Carbon Certification (ISCC) may be used. DHL Group used the SAF and reduced emissions from its greenhouse gas emission balance reporting Scope 1 and Scope 3 category 3. When DHL Group engaged in a low emission transport solution through a partnership with DHL partner airlines, it resulted in a reduction of the Group's greenhouse gas emissions within the Scope 3 category 4. Further details about the fuel partners and batches can be provided upon request. The Sustainable Aviation Fuel ("SAF") as documented within this certificate, has been purchased by DHL Group or its affiliates. SGS (Société Générale de Surveillance) has verified the tracked greenhouse gas emissions and the related reductions against the Carbon Management System and according to the, Greenhouse Gas Protocol – Product Life Cycle Accounting and Reporting Standard". Definitions of the terms mentioned in this certificate can be found on the following page. DHL Group does not take any liability relating to the ability of its customer to make a successfully claim of emission reduction of Scope 3 category 4 and 9.

1) Reference Standard Service – refers to entire contracted logistic service.
2) The above Energy Source figures are calculated with verified conversion factors and are provided for reference only.
